Mary Besterfield-Sacre	Professor & Associate Dean for Academic Affairs <i>University of Pittsburg</i>	January 24
Kristen St. John	Associate Professor, Paleooceanography and Geoscience Education <i>James Madison University</i>	March 28

The purpose of the CREATE Science Seminar series is to help create a vibrant collaborative community at MSU around research in science education K-16, to provide a venue to disseminate and discuss innovative research methods and results, to foster relationships and networking with national and international experts in STEM education research, and ultimately to help solve challenging problems in the teaching and learning of science, K-16.

Seminar series events feature an interdisciplinary audience of faculty, postdoctoral fellows, graduate students in STEM with a broad interest in Discipline-Based Education Research (DBER), Science Teacher Educators, K-12 STEM education researchers, K-12 science teachers, and school administrators.
