Would you like to present at the 2018 Meeting of the National Numeracy Network (NNN)? We invite educators to submit proposals that highlight topics such as:

- Access to QL/QR coursework as a gateway to graduation or to participation in STEM majors
- Social justice and QL/QR
- Connections between QL/QR and other disciplines (e.g., the digital humanities, science, economics, statistics)
- Connections between QL/QR and other literacies (e.g., information literacy, statistical literacy)
- Leading QL/QR centers
- Teaching QL/QR

**Types of Presentations:**

1. **Presentations (30 minutes):** Presenters will have 20 minutes for a talk, and 10 minutes for questions and discussion
2. **Facilitated discussions (60 minutes):** Facilitators will introduce a topic for 20 minutes, and then lead a discussion or activity for 40 minutes.
3. **Working groups (60 minutes):** Individuals interested in discussing particular topics or issues that are relevant to the teaching and learning of quantitative reasoning may propose a working group that will be considered for a potential program slot. We anticipate that there will be up to three working groups in the program.

**Proposal Submission Guidelines:**

Please include the following in your proposal and submit directly to Eric Gaze (egaze@bowdoin.edu) by July 31, 2018. Proposals should be a maximum of one single-spaced page.

1. Name, professional title, and institutional affiliation of contributors (including those unable to attend)
2. Title and type of session (paper/facilitated session/working group)
3. Session description and justification: Clearly identify which topic you will address, your relevant experience, and--if proposing a facilitated discussion--how you will engage the participants. Proposals are expected to highlight relevant aspects of the chosen topic that address developments in the field while sharing best practices or innovative solutions.
4. A 100-150 word abstract for the printed program

Note the conference will also include keynote presentations and a student panel.

**2017 Meeting:** Our 2017 national meeting at Barnard College, NYC, was very successful. Over 100 registered participants. Thirty-two sessions on QL/QR/Statistical Literacy topics.
