

CREATE for STEM Institute *meets London!*

June 23th - June 27th

13th International Conference for the Learning Sciences

Saturday, CREATE staff will tackle Designing Knowledge-In-Use Assessment Tasks and Rubrics to Assess and Promote Deep Learning in Science Classroom

Sunday, CREATE staff will work on modeling key scientific practice used by scientists. This workshop will present an open-access online modeling tool, SageModeler, designed to allow secondary students to build and revise models in order to make sense of various phenomena.

Monday, CREATE staff will speak on The Challenge of Assessing “Knowledge in Use.”

Tuesday, CREATE will speak on Developing Assessment Tasks to Promote Student Sense-making of Phenomena and Flexible Thinking, Measuring Integrated Knowledge-A Network Analytical Approach, and Examining Primary Teacher Expertise and Agency in the Collaborative Design Project-Based Learning Innovations
