Discussion with director to follow

**Wednesday October 17<sup>th</sup> 6:30 – 8:30 pm**  
**Room 1200 Molecular Plant Sciences Building**

Welcoming National Geographic film director Clare Fieseler

Clare Fieseler is an Assistant Teaching Professor in the Science, Technology, and International Affairs Program at Georgetown University. She has served on the board of the Society of Conservation Biology and worked as an Innovation Fellow for the DC-based organization, Conservation X Labs. Clare uses photography, photo mosaics, and 3D technology to study the impact of climate change on the Caribbean's resilient but rapidly disappearing coral reefs.
